The Business of this Company consists in the Purchase of, or Loans upon

REVERSIONARY INTERESTS, vested or contingent, in LANDED or FUNDED PROPERTY, or SECURITIES; also LIFE INTERESTS in POSSESSION, as well as in EXPECTATION.

LOANS UPON REVERSIONS may be obtained either at an Annual Interest, or in consideration of deferred charges, payable upon the REVERSIONS falling in.

PRESENT INCOMES are likewise advanced upon the latter principle to persons entitled to Reversionary Interests, who may thus obtain the means of support until their property falls into possession, without being called upon for any payment until that event.

Prospectuses and Forms of Proposal may be obtained from the Secretary, to whom all communications should be addressed.

## OFFER THE FOLLOWING ADVANTAGES TO INSURERS.

Reduction of Risk of Accident or Explosion, by efficient, but not arbitrary inspection. Written reports sent to the owners thereon.

General Advice, founded on experience of many thousands of Boilers, given by the Chief Engineer.

If Explosion occurs, damage to Boilers, Buildings, &c., made good. Furnace Tubes injured through deficiency of water restored to working order.

This Company's Policies now include, without extra charge, claims for personal injury, under the Employers' Liability Act, 1880, from Explosion of Boilers or Collapse of Flues.

SOLE PROPRIETORS OF THE PATENT IMPROVED DOUBLE CONE FUSIBLE PLUG, a most valuable safeguard against damage through deficiency of water. A new Cone can be screwed in from the furnace without removing man-hole cover. No other plug possesses such advantages.

Policy Claims Paid .....	8,200,000

The ASSOCIATION employs NO AGENTS, and pays NO COMMISSION in any shape for the introduction of Policies.

Its expenses are small, being less than 3 per cent. of its annual income from premiums and interest.

An investigation of its affairs is made every year, and the surplus is applied first in reducing the Premiums until they are extinguished, and then in increasing the sum assured. The first seven premiums are payable in full and the reduction begins with the eighth. During the last 30 years this reduction has *increased*, on the average, at the rate of about One per cent. per annum, and as the mortality among its Members continues to be much within the estimate, and the funds of the Society are invested at a higher rate of interest than is assumed in the valuations, it is expected that the Premiums may be still further reduced.

**PREMIUMS commenced before July 1877 (4th series) are this year reduced 67 per cent.**

"	"	<b>July 1876 (3rd series)</b>	"	"	<b>77</b>	"

"	"	<b>January 1856 (1st series)</b>	"	"	<b>100</b>	"

And, as the reduction of premiums in the First Series can be carried no further, an addition of two per cent. of the annual premium has been this year made to the sum assured.

Insurances against Loss by Fire and Lightning are effected by the PHENIX COMPANY upon every description of Property, in all parts of the World, on the most favourable Terms.

The experience of over a century has made manifest the promptitude and liberality with which its engagements are always met by this Company, and the importance of its relations with the Public may be estimated from the fact that, since its establishment, it has paid in discharge of Claims for Losses more than

**FOURTEEN MILLIONS STERLING.**

Persons insured by this Company are not liable to make good the Losses of others, as is the case in many Offices, and the protection afforded is undoubted, the Capital being largely invested in Government Securities, and the Proprietary including some of the most opulent Gentlemen and Merchants in the kingdom.

Rates and Particulars of Insurance may be obtained at the Chief Offices, Lombard Street and Charing Cross, and from the respective Agents of the Company, for whose Names see body of this Directory.

# Bell's Asbestos Works

**BELL'S PATENT ASBESTOS BLOCK PACKING**, for Marine and Pumping Engines. This Packing has been specially designed to overcome the difficulties experienced by marine engineers and others in the practical working of engines of the most modern type of construction. The greatly increased skill and workmanship now obtained in the construction of engines and boilers have led to a rapid increase in the working pressure, the object being the attainment of a high rate of speed combined with economical working, the practical advantage of which, however, cannot be realised unless the Packings are so constructed as to avoid stoppages at sea for the purpose of re-packing the stuffing boxes.

It is now a recognised fact that the most perfect heat-resisting material suitable for the purpose of a Packing is Asbestos, but to ensure a successful application of this fibre, great skill is required in its selection and manufacture. In this Packing the Asbestos is woven into a stout cloth, and owing to the peculiar way in which it is manipulated, great elasticity is imparted to the Packing. So successfully has this been done, that with light screwing, it has been found in practice that little or no lubricant is required to insure a minimum amount of friction, and to keep the rods from over-heating. An improved vacuum is always maintained by the use of this Packing, which meets with unqualified approval wherever it is applied.

This Packing is made in four forms to meet various requirements, viz., as Fig. 1, square, 2, round with solid rubber core, 3, with tubular rubber core, 4, without core, but with rubber inlaid. As these packings are extensively imitated, and as it is a common practice among dealers and agents to supply these cheaper manufactures at my list prices, users are requested to see that the packing supplied to them bears my trade mark.

**BELL'S PURE ASBESTOS PLAITED YARN PACKING.** This is the best and most economical Piston Packing in the market for High and Low Pressure Stationary Engines. Of course there are many imitations of a Packing so universally approved of, but I am the Original and Sole Manufacturer of the genuine article. Every 10ft. length of this Packing bears a label with my Trade Mark, and users are recommended to see that this label is attached, to secure their obtaining the material they have ordered.

**BELL'S ASBESTOS YARN AND SOAP-STONE PACKING** for Locomotives and all Stationary Engines running at very high speed with intense friction.

The following Testimonial refers to this Packing:—**Testining Railway, Locomotive Superintendent's Office,** Portmadoc, January 13th, 1893.

Mr. JOHN BELL, 118, Southwark-street, S.E.—I have much pleasure in saying that the Asbestos Yarn and Soapstone Packing gives every satisfaction, indeed better than we expected. We have a locomotive packed with it, which has been running five months (and think of the piston speed with our small wheels). I think the Soapstone a great improvement, as it keeps the Packing elastic and prevents it getting hard. I am very pleased with its working, and also the very low price for such good lasting Packing. The Asbestos Yarn we find is very useful and answers admirably.—Yours truly, (Signed) WILLIAMS.

Every 10ft. length of Bell's Asbestos Yarn and Soapstone Packing bears a special label with the Trade Mark, and engineers are earnestly requested to see that this label is attached, to prevent imposition by worthless imitations.

**BELL'S ASBESTOS BOILER COVERING COMPOSITION** (Fig. 5) for coating the Pipes and Boilers of every kind of Marine and Stationary Engine. Non-combustible, and easily applied when steam is up; adheres to metals, and preserves them from rust; prevents the unequal expansion and contraction of boilers exposed to weather; covers 50 per cent more surface than any other coating, and is the most durable material of its class. The composition is supplied dry, and is only to be mixed with water to the consistency required for use.

The following Testimonial refers to the Asbestos Boiler Covering Composition: **THE MAXIM-WATSON ELECTRIC CO. (Limited), 29, Bankside, London, S.E.** Jan. 4th 1893.

Mr. JOHN BELL, 118, Southwark-street, S.E. To inform you that I find the thermometer, placed 3 ft. above the boiler's new stand at 93 deg.; before your covering was put on it used to stand at 116 deg. With regard to the saving of fuel, I am unable to speak very accurately, as the boilers were not working long enough before being covered to ascertain the amount of fuel that would be consumed in an ordinary run, but I feel quite justified in saying that we burn less by about 5 cwt. per night than we were doing, and I shall be glad at any time to show the boilers to anyone who may wish to see them, as I consider yours the best covering that I have, up to the present, seen.—Yours faithfully, J. H. GUNDAHL, Works Manager.

**BELL'S ASBESTOS & INDIA-RUBBER WOVEN TAPE AND SHEETING**, for making every class of Steam and Water Joints. It is the most efficient material for making bilge water pipe Joints. It can be bent by hand to the form required without puckering, and is especially useful in making joints of manhole and mudhole doors; also for large "still" joints where boiling fat and steam have to be resisted. It is kept in stock in rolls of 100ft., from 4in. (Fig. 6) to 3in. wide, and any thickness from 1-16th in. upwards. Manhole covers can be lifted many times before the renewal of the jointing material is necessary.

The same material is made up into sheets about 40in. square, and each sheet bears my Trade Mark, without which none is genuine. The engineer of a world-renowned firm writes:—"There is not, nor can there be, any doubt as to the excellence of your Asbestos and India-rubber Woven Sheetings. As a jointing material it is unrivalled." The engineer of a large colliery writes:—"I would in all candour say that your Asbestos and India-rubber Woven Sheetings are first-rate for joints. In my twenty-five years' experience I have not seen anything like it. I highly recommend it to all those who have to do with steam engines."

It is very necessary to guard against imitations of this useful material, and to secure themselves against being supplied with these cheaper articles at my price, users are recommended to see that every 10ft. length of the Asbestos Tape purchased by them bears my Trade Mark.

**BELL'S SPECIAL LONDON-MADE ASBESTOS MILLBOARD**, for Dry Steam Joints, made of the best Asbestos fibre is well known for its toughness and purity, and is absolutely free from the injurious ingredients frequently used to attain an appearance of finish, regardless of the real utility of the material. Made in sheets measuring about 40 inches square, from 1-64th inch to 1 inch, and 1/4 millimetre to 25 millimetres thick. Each sheet bears my Trade Mark. Engineers and others in charge of machinery are invited to inspect Bell's Asbestos Goods at any of the undemonstrated addresses, or to write for particulars.

## HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is Patented, the Pure White Zinc Paint is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere. In all climates it is superior for the inside and outside of Houses, Iron Roofing, Ships, Lighthouses, and Bridges. Each cask of Pure White Zinc Paint is Stamped—"HUBBUCK, LONDON, PATENT."

## THOMAS HUBBUCK & SON, WHITE LEAD, OIL & VARNISH WORKS, 24, LIME STREET, LONDON, E.C.

### HUBBUCK'S PREPARED LIQUID PAINTS.

These Paints are packed in 1 lb., 2 lb., 3 lb., 4 lb., 7 lb. and 14 lb. tins, and in 28 lb. drums; and will be found of great advantage. Being mixed ready for immediate use, no further preparation is needed. This prevents the waste of carrying stiff Paint, Oil, Turpentine, &c.

### HUBBUCK'S ANTI-CORROSIVE PAINTS.

The most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings exposed to stormy weather, and scorching sun; they soon become extremely hard, do not blister, and are very durable.

They are made Stone, Slate, Copper, White, Blue, Green, or any other colour that is desired.

### HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling or corrosion. This composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

### HUBBUCK'S PALE BOILED LINSEED OIL,

Being much purer than Raw Linseed Oil, is the only Boiled Oil that can be used for white and delicate coloured Paints. It dries quickly and hard, never blisters, and is more durable.

### HUBBUCK'S WHITE LEAD, PAINTS AND OILS, Properly Packed for Exportation.

**CAUTION.**—Since the successful introduction of their PALE BOILED LINSEED OIL, some dealers are selling colourable imitations as "Improved Boiled Oil," "Clear Boiled Oil," &c. These imitations are not to be depended on, and only cause disappointment and loss.

**CONVICTION.**—In April, 1873, a Native Dealer at Hong Kong was prosecuted and convicted of a fraudulent imitation of Hubbuck's Name and Mark, and of placing them on some spurious goods shipped from London.

*University College, London.*

*First Class in Natural Science Honours; Medallist in Chemistry; Prizeman in English; Author of "An Elementary Latin Grammar;" "Chemical Analysis for Schools and Science Classes," &c.*

There is a large and efficient staff of Assistant Masters.

The College is situated on an eminence, in the midst of its own grounds of 19 acres, in a healthy and pleasant situation. It is about 10 minutes' walk from Framlingham Station, on the Great Eastern Railway, and is distant 90 miles from London. The building is well arranged, thoroughly suited to its purpose, and adapted for the accommodation of 300 boarders.

There is a large Swimming Bath near the College, where the boys are taught to swim, and a tepid Plunge Bath within the building for use during the winter, and also Sanatorium, Chemical Laboratory, and Carpenters' Shop, &c.

The object of the Institution is to provide for the Middle Classes, at a moderate cost, on Public School principles, a practical training, which shall prepare the Pupils for the active duties of Agricultural, Manufacturing, and Commercial life, and qualify them for the Civil Service, and other competitive examinations. Boys are also prepared for the Universities, especially the Matriculation Examination of the University of London, and the College is a centre for the Cambridge Local and South Kensington Examinations.

## EDUCATIONAL HOME FOR YOUNG LADIES,

Elizabethan School, The Market Hill, Framlingham.

(IN UNION WITH TRINITY COLLEGE.) ESTABLISHED 1860.

*Principal: MRS. WEBBER, M.T.C., (Cert. R.C.),*

ASSISTED BY RESIDENT ENGLISH AND FOREIGN CERTIFICATED GOVERNESSES AND PROFESSORS.  
Senr. Cambridge, College of Preceptors, and Kensington Exams.

THIS Establishment is intended for Young Ladies, for whom a course of instruction is provided, which includes every study and accomplishment necessary to a good and sound education based on the modern system.

The utmost care is bestowed upon the Religious and Moral Culture of the Pupils, as also upon their health and lady-like conduct; and every comfort and all home privileges consistent with the necessary school discipline are secured to them.

When desired, Pupils can remain during the vacations; and entire charge can be taken of the daughters of military and naval officers and others residing abroad.

Pupils have passed successfully the Senior Cambridge, College of Preceptors, and Russell College Examinations; for the latter Examination this School is the Local Centre.

French and German taught conversationally and grammatically.

Day Pupils, Termly, Weekly and Daily Boarders received. Fees Moderate. References to Clergymen and others.

The House is large and commodious with pleasant garden.

PENSIONNAT DE JEUNES DEMOISELLES, 5, CLARENCE TERRACE, ST. HELIER, JERSEY.

Je suis heureuse de joindre ici mon témoignage à celui d'autres amis, pour recommander avec une entière confiance le pensionnat de Mme. Webber, à Framlingham, Suffolk, Angleterre. J'ai demeuré trois ans avec Madame Webber, et je puis assurer aux parents qui voudraient bien confier l'éducation de leurs demoiselles, qu'elles trouveront dans son établissement des soins tout particuliers tant pour le bien-être que pour une saine et solide instruction.

LOUISE LE TOUZELL-MOLLET.

EISELEBEN, PROVINZ SACHSEN, DEUTSCHLAND.

Mit vielen Vergnügen empfehle ich Frau Webber's Schule und Pension zu Framlingham in der Grafschaft, Suffolk; die ich durch längeren Aufenthalt daselbst kennen gelernt habe. Sowohl der Unterricht, der gründlich, und nach dem modernen System betrieben wird, wie auch die bequeme Anordnung im Haus und in der Schule, fördern die Gesundheit, die Zufriedenheit und das Wissen der jungen Damen und Kinder. Ich kann daher den geehrten Eltern empfehlen ihre Kinder der ausgezeichneten Anstalt von Frau Webber mit Vertrauen zu übergeben.

# THE BURY AND NORWICH POST AND SUFFOLK HERALD,

EXTENSIVELY CIRCULATED IN  
SUFFOLK, NORFOLK, ESSEX, CAMBRIDGESHIRE & ISLE OF ELY.

ESTABLISHED 1782.

PUBLISHED AT BURY ST. EDMUNDS EVERY TUESDAY, PRICE TWOPENCE.

"THE BURY AND NORWICH POST AND SUFFOLK HERALD," the only Newspaper in Bury St. Edmunds which is neither partly printed elsewhere, nor employs stereotyped news columns, has for OVER ONE HUNDRED YEARS enjoyed the highest reputation as the leading Journal in the important agricultural district of which Bury is the centre. It is unrivalled in the locality for the accuracy and completeness of its reports and its general contents. In the early part of 1883 it was enlarged in size, and attractive features added. It is the largest and best local paper.

Owing to its extensive circulation amongst the nobility, gentry, clergy, farmers, and the mercantile and trading community, and to the circumstance that it is published on the afternoon preceding Bury St. Edmunds Market, "THE BURY POST AND SUFFOLK HERALD" is undoubtedly the best medium for advertising. *Objectionable advertisements are rigidly excluded.*

Scales of Advertisement charges will be sent Post free on application. A liberal reduction for a series.

Printed and published for the Proprietors at the Offices, 26, Hatter Street, Bury St. Edmund's. Cheques should be made payable to the Proprietors, and Post-office Orders payable to Mr. J. J. ROBINSON.

## THE BURY ST. EDMUNDS FREE PRESS,

EVERY DESCRIPTION OF PRINTING EXECUTED IN THE BEST MANNER.

## THE BURY AND SUFFOLK STANDARD,

CIRCULATED IN

Suffolk, Norfolk, Essex and Cambridgeshire.

Established 1869.

PUBLISHED EVERY MONDAY EVENING AND TUESDAY AFTERNOON, AT THE OFFICE, 19, ABBEYGATE STREET, BURY ST. EDMUND'S.

This is the ONLY Penny Paper and the only Conservative Newspaper in this part of the County of Suffolk. It has consequently the MOST EXTENSIVE CIRCULATION amongst the UPPER CLASSES and AGRICULTURISTS and residents generally throughout the district, and is therefore the most desirable medium for advertising. The charges for Advertisements are strictly moderate.

**“DAYLIGHT,”**

**WEEKLY ILLUSTRATED, PRICE ONE PENNY,**

Is positively the only Independent Political, Social, and Satirical Weekly Journal circulating in the Eastern Counties between Liverpool Street, London, and King's Lynn.

The circulation of “Daylight” has always been good; but since its pages have been Illustrated with a Cartoon and several small Sketches weekly, it has more than doubled, and has now a larger circulation in Norwich than any other paper, and moreover it has a very large sale throughout the Eastern Counties. As an Advertising Medium for the Eastern Counties it has, therefore, no equal.

## THE NORWICH ARGUS,

A CONSERVATIVE JOURNAL.

Published every Friday (for Saturday) Price **1½d.** The Oldest Cheap Newspaper in the City.

Circulates through Norfolk, Suffolk, Cambridgeshire, and Essex generally.

THE circulation of this Journal is weekly extending; its known advocacy of constitutional principles—from whichever party they may emanate; its firm attachment to the Church of England; its known attention to all matters concerning legislative enactments, agricultural and manufacturing interests, colonial and foreign events, literary, naval, and commercial affairs, render its *Eight closely-printed Pages* eagerly sought for alike by the Religionist, the Farmer, the Officer, and the Man of Business.

Auctioneers, Solicitors, and Traders generally will find the columns of the *Norwich Argus* a first-class medium for Advertisements.

The *East Anglian Handbook and Agricultural Annual* published in December of each year. Mainly Agricultural, but containing also Scientific and other Articles, with light reading matter. Contributed to by Mr. C. S. READ, M.P., Professor WANKLYN, Dr. TAYLOR, F.G.S., FLORENCE MARRYAT, &c.

## THE "WASH-OUT" CLOSET (PATENTED).

Extract from the *Architect* of June 9th, 1877, page 373.—"How to Drain a House," from a Paper by T. MELLARD READE, Esq., C.E., read before the Liverpool Architectural Society:—

"I consider the pan closet objectionable, especially since the compulsory introduction of the 2-gallon regulating cistern has increased the difficulty of getting the after flush to fill the pan. The 'Container' is usually a reservoir coated with filth, hidden by the pan holding the water in the basin. A basin with a trap at the side or back, called a 'WASH-OUT' basin, is a far better apparatus."

"Improvement in Sanitary Condition of Houses," from a Paper by J. CORBETT, Esq., read before the Social Science Congress, Manchester, 1879:—

"We replace defective closet appliances by the simple 'WASH-OUT CLOSET,' which is of white earthenware, without any valve, and so perfectly self-cleansing as to require very little attention."

Extract from a letter by "M. O. H.," a medical officer of health, *Daily Telegraph*, 22nd September, 1880:—

"The Local Government Board forbids the use of these pan closets . . . they may be easily replaced by one of the 'WASH-OUT CLOSET BASINS.'"

# SEND FOR A PRICE LIST OF JOHN BLAKE'S PATENT SELF-ACTING HYDRAULIC RAMS,

For Raising Water for the supply of Towns, Villages, Irrigation,  
Railway Stations, Mansions, Fountains, Farms, &c.

No Cost for Motive Power, which is obtained from the Stream of Water  
passing through the Rams.

NO OILING OR PACKING REQUIRED.

Made in sizes to raise from 800 to 500,000 Gallons per day. Will force to a height of 1,500 ft.

Special Rams for High Falls to send up Two Gallons out of every Five Gallons passing  
through them.

This Ram will force a part of the same water that works it, or will force clean water from a well or spring whilst worked by a stream of impure water. Rams on this principle can be supplied to force to a height of 1,500 feet.

This Ram, for deep working falls, is capable of sending up two gallons out of every five gallons passing through it.

## TESTIMONIALS.

From T. H. SIDEBOTTOM, Esq., Etherow House, Hadfield,  
February 22nd, 1882.

"Induced by the good report of my cousin, Mr. J. A. Sidebottom, as to the working of the Hydraulic Ram he had from you, I ordered the one you fixed here a year ago, which I am pleased to say has since worked well night and day. Yet the two rams you fixed at Snow's Hill Manor, Gloucestershire, for my brothers and myself, are I think, a still more remarkable example of your success. We had a Ram fixed by a well-known firm, which proved a miserable failure, and which your Rams displaced. They are forcing the water through three-quarters of a mile of delivery pipe, a little in excess of the quantity you guaranteed, to an elevation of 340 feet, and without the slightest hitch to the time of the last report from our tenant."

From Mr. HENRY ROBINSON, Engineer to the Stockport District  
Water Works Co., Stockport, Sept. 8th, 1883.

"DEAR SIR,—I can now report well of the two Hydraulic Rams we have fixed, to your instructions, for the supply of Disley village. 40,000 gallons per day was the quantity you promised they would force to a height of 68 feet; but, on testing them, I am convinced that 50,000 gallons is not the limit of their power, whilst the quantity of waste water used in driving them is not equal to half the capacity of the 6-inch pipe by which they are fed, and I am inclined to the belief that a more simple and efficient pump cannot be found."

From the Right Hon. the Earl of ROMNEY, 56, Eaton Place, S.W.,  
June 12th, 1880.

"SIR,—In reply to your inquiry, I have pleasure in stating that the Hydraulic Ram which you erected for me at Gayton does its work remarkably well, and is a great success. I think the work is especially creditable to you on account of the very small fall of but 3 feet with which you had to deal, and I shall always be glad to recommend you.—Yours faithfully, ROMNEY."

From Captain GANDY, Castle Bank, Appleby, Feb. 11, 1880.

"The Self-acting Hydraulic Ram you erected for me is an excellent example of strength and good workmanship. Whilst working with 3ft. 4in. fall, it forces water 73ft. high, and so far gives me every satisfaction. It will do more work in one day than the old Ram of another make could do in a week."

Blake's Rams have been supplied to the following—amongst others:

To His Royal Highness the Duke of Connaught  
,, His Highness the Maharajah of Kashmir  
,, His Grace the Duke of Cleveland  
,, His Grace the Duke of Portland

,, The Right Hon. Lord Viscount Bridport  
,, The Right Hon. Lord Viscount Clifden  
,, The Right Hon. Lord Leconfield  
,, The Right Hon. Lord Ribblesdale  
,, The Right Hon. Lord Hatherton

From Mr. WILLIAM LAIT, Architect & County Surveyor, Compton  
Verney, Warwick, 16th January, 1882.

"I have very much pleasure in stating that the Patent Hydraulic Ram I had from you for the Rev. J. Cardwell-Gardner, of the Vicarage, Butler's Marston, and which you fixed there, is, I consider, remarkably successful, as indicated below: 4,120 gallons of water per day are passing through the Ram with a descent of 13ft. 8in. Out of this small quantity 1,080 gallons are sent up to a height of 41ft., showing 78 per cent. of useful effect, and the noise of it working is so slight as to be almost inaudible."

From V. F. BENNET-STANFORD, Esq., M.P., Pyt House, Tisbury,  
Wilts, August 20, 1880.

"I have no hesitation in saying your Self-acting Hydraulic Ram and apparatus for extinguishing fire, which you laid down here, including about one mile of pipes, are very satisfactory. The Ram forces upwards of 5,000 gallons per day to a service reservoir holding 25,000 gallons, at an elevation of 296ft., being 70ft. above the roof of the house, from which reservoir the water is distributed to the house, stables, home farm, and several cottages; and in case of fire, four jets can be thrown on the house from different sides at a great force and large volume. I consider your work has been done well and efficiently, and does you credit."

From Captain TOWNSHEND, Wincham, February 10th, 1877.

"In answer to your enquiry, I am glad to say the Hydraulic Ram you sent me in November, 1875, is working exceedingly well, and gives no trouble. It will work when quite immersed, as it has been several times during the floods this winter, forcing up water through a delivery pipe 900 yards long at the rate of 80,000 gallons per day, although you only promised 50,000."

From Mr. JOHN ARCHBOLD, Engineer to Messrs. Barber, Walker  
& Co., Eastwood, Notts, October 21st, 1882.

"I am glad to inform you that the Hydraulic Ram you fixed for Thomas Barber, Esq., whilst working with a fall of 30 feet, and forcing to a height of 90 feet, through 200 yards of delivery pipe, is working exceedingly well, throwing up 9 pints out of every 35 pints passing through it, thus giving 77 per cent. of useful effect."

# HISTORY OF ROME

AND OF THE ROMAN PEOPLE,

FROM ITS ORIGIN TO THE ESTABLISHMENT OF THE CHRISTIAN EMPIRE,

By VICTOR DURUY,

MEMBER OF THE INSTITUTE, EX-MINISTER OF PUBLIC INSTRUCTION, ETC.

(Translated by W. J. CLARKE, Esq., M.A.);

Edited by the REV. J. P. MAHAFFY,

PROFESSOR OF ANCIENT HISTORY, TRINITY COLLEGE, DUBLIN.

Containing about 3,000 Engravings, 100 Maps and Plans, and numerous Chromo-Lithographs,  
by Goupil, Percy, and others.

**NOTICE.**—In consequence of many representations which have been made, the publishers have doubled the size of the Monthly Parts, thus completing the work in Three years instead of Six. The price of the part is at the same time only slightly increased; the only faults which have been found with the work have been the price and the long time occupied in its production, and in remedying these, the publishers hope they may be successful in producing what is universally admitted to be the best book extant on the subject, in a style in some degree commensurate with its importance, at a price never before attempted.

The effect of the alterations will be that the book will be published in Three years instead of Six,  
at a cost of £9 6s., instead of £14 8s.

"The merits of M. Duruy's work are so widely acknowledged that it is not necessary to enter upon any lengthened statement showing the great range of historical research displayed in it, or upon any fresh eulogy of the author's power of exposition and illustration. It deals confidently and plausibly with the elucidation of all that is obscure in the great borderland between the pre-historic and the historic. There could be no better New Year's Day present to a student than the magnificent edition of M. Duruy's 'History of the Romans,' the fifth volume of which (dealing with the period 117 to 180 A.D.) has just been issued. It is a book well arranged, well written, well printed, and well illustrated."—*Times*.

"Messrs. Kelly & Co. have undertaken to present the public with an English translation of Victor Duruy's splendid work on the 'History of Rome,' and to present it in a form which will secure for it as good a place in all English bookcases as the original holds in France. The work has been translated by Mr. W. J. Clarke, M.A., and edited as it is by Professor Mahaffy, we have, with Messrs. Kelly & Co. as publishers, the best of all guarantees that the work, when complete—it is to appear in monthly numbers—will be all that such a work ought to be. The illustrations and letterpress of the specimen number before us are perfect."—*Yorkshire Post*.

"Duruy's 'History of Rome' is one of the best-known works of its class in the French language, and already considered by competent judges to be a standard book of reference, M. Victor Duruy having availed himself of every possible assistance, both from the pages of the great German and Italian Roman historians, such as Niebuhr, Ottfried, Müller, and Micali, and also from the works of more recent writers, not only on Latin history and literature, but upon the Roman antiquities and late discoveries tending to throw light upon events of historical importance. Messrs. Kelly & Co. have done wisely by intrusting the task of M. Duruy's work into English to the Rev. J. P. Mahaffy, who has produced the remarkably readable and fluent version which is now appearing in monthly parts. The first part is finely produced, the type is clear, the engravings, always appropriately selected, are admirable, and the maps excellent."—*Morning Post*.
